

EduHealth

A solution for better student health management

56%

of children younger than 18 years of age take at least 1 medication, and 27% take 2 or more;

21% use at least 1 prescription drug. Safe and correct medication administration during school hours is a challenge for school systems. American school systems deliver medication to more patients than in large hospitals or nursing home systems. Approximately 6% of school-aged children (nearly 13 million) receive medications while in school, and 80% of school-related medication errors reported were missed doses.

Based on these findings, EduHealth System was built in collaboration with School Nurses. The entire medical portal is built on SharePoint to take advantage of special Microsoft Licensing for Education. This application helps effectively manage and monitor the health and medication safety of students. The comprehensive feature set integrates the ecosystem of Schools, Pharmacies, Doctors and Home to promote Student Health.

Digitize Medical Records

Digitization of Student Health Records
Bulk upload student documents
Central searchable document repository

One-Stop Nurse Portal

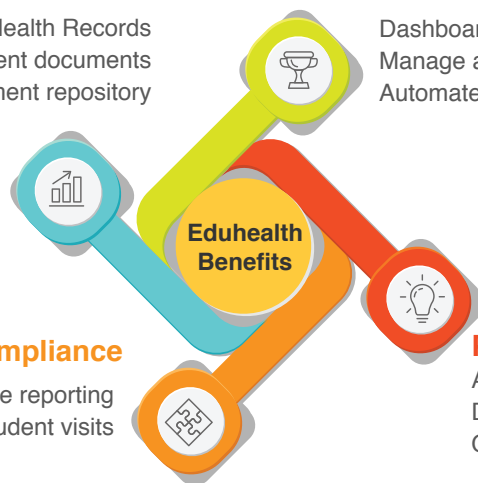

Dashboard of Student health profile
Manage and Track Student Sick Visits
Automated Medication Schedules

Compliance

Statutory compliance reporting
Complete audit log of student visits

Peace of Mind

Automated alerts to Parents
Direct access to Child Information
Online Child Health Form Submission

Key Functionalities

- Digitize visits and records, Reduce Paper trails, ensure compliance
- Manage Drug Inventory, ensure availability
Never worry about low medical inventory or expired medicines, the system is capable of managing all such needs.
- Tracking systems for alerting & monitor drug administration
Create medication, immunization schedules and follow-ups, create timers and alerts for low medical inventory, automatically send trackers for parents and doctors in specific cases.
- Manage regional health issues due to seasonal changes
Manage flu season and other seasonal illness with announcements and alerts. Be abreast with latest happenings in the district and ensure compliance
- Communicate with parents, Staff and Administration, especially when the child needs special medical care
Communicate with parents of special need kids without any hassle and ensure proper paperwork is retained including managing the annual physical records Ensure a digital record system even if your doctor still uses manual paper
